# Sanitized Pro

## Deepest cleaning all-purpose cleaner

Sanitized Pro can be used a powerful disinfectant on hard surfaces. Spray cabinets, drawers, counters, sinks, or mop floors for the most effective cleaning solution possible. Cleaning products today are great at smelling clean, but studies show that they are not the best at actual cleaning and disinfecting what they are meant to clean. Independent tests show that Sanitized Pro is proven to have the lowest hygenia meter reading when applied versus other cleaning products, which means you get the deepest clean, killing the most bacteria with Sanitized Pro. Sanitized Pro is fragrance free and acts as a deodorizer, eliminating any unwanted smells that may be lingering. Sanitized Pro is completely harmless to humans and has been given the lowest possible toxicity rating by the Sanitized Pro (which is none). Sanitized Pro does not require any protective gear for the user, is as effective as bleach, with none of the harsh side effects and environmental impact that accompany bleaching. Sanitized Pro is EPA registered as a hard, nonporous surface disinfectant and gets you the deepest clean that is very cost effective.
